File Type Verifier: how it is put together

Okay, here's the technical documentation for the file-type-verifier tool, focusing on security aspects and adhering to your requirements:

sketched from the files

File Type Verifier: the run, step by step

If a step fails, the honest run says so and stops.

traced, not guessed, GK

Product map: what File Type Verifier is for

WHAT IT IS

Okay, here's the technical documentation for the file-type-verifier tool, focusing on security aspects and adhering to your requirements:

WHAT GOES IN

The files at the top of the tree: README.md, main.py, banner.png.

WHAT COMES OUT

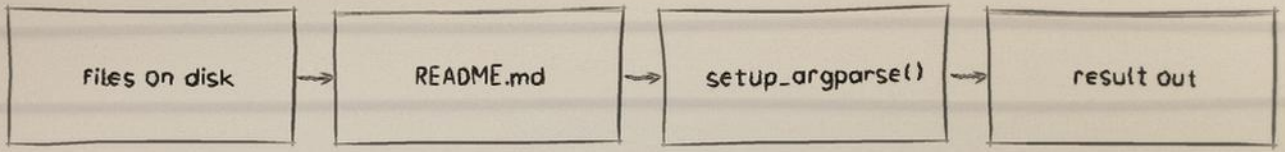

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, 

File Type Verifier: data flow, in one direction

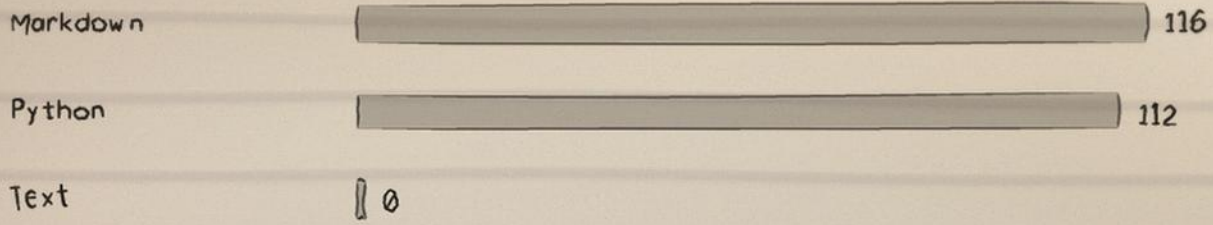

One direction. Anything the code does not do is not drawn.

second sheet, GK

File Type Verifier in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

6 files in the tree.

8 commits, first 2025-01-02, last 2026-10-30, from the local git log.

No test files by name in this snapshot.

counted and drawn, GK

File Type Verifier: schematic of the apparatus

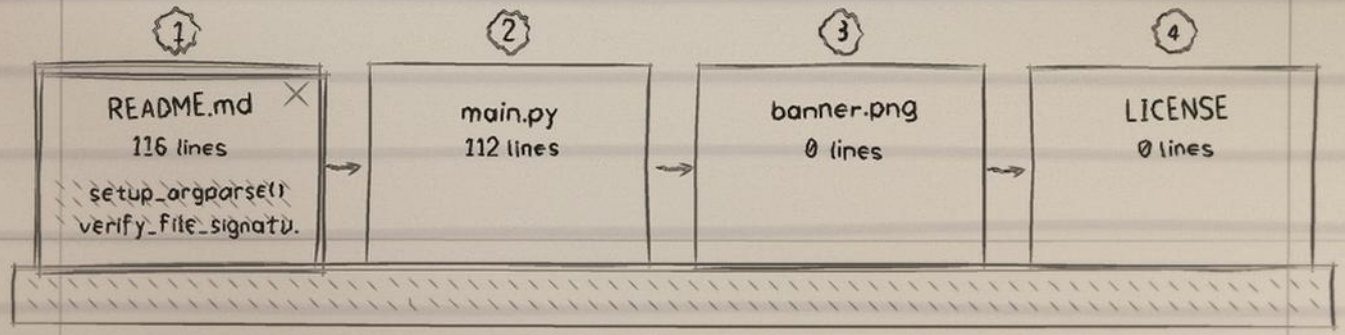

the system as a machine: parts, flow, and measurements

construction lines left in, as drawn

parts list

1. README.md
2. main.py
3. banner.png
4. LICENSE

in flow order, first to last

base plate: the repo itself, sectioned

span: 6 files, 228 lines counted

turns of the crank so far: 8 commits, 2025-01-02 to 2026-10-30

measured and sketched, CK
